CONDITION	Good

About this piece

Ernest Gimson, Alfred Bucknell. Arts and Crafts Tall Steel Candlestick

Designed by Ernest Gimson. A rare unusually tall steel candlestick made by Alfred Bucknell, punched and chased with geometric design to the top, and a beautiful detail underneath the circular drip tray, perfection even to the place that is rarely seen, with dot decoration to the stem and a central knob positioned to aid handling.

Alfred Bucknell moved to Waterlane, started his career at Sapperton with Gimson after his potential for metal working had been spotted by Alfred Powell.

From 1903, Alfred Bucknell and Gimson worked together at Sapperton making items such as furniture fittings, latches, candle sconces, firedogs, floor and table lamps, ceiling and wall lights, and ecclesiastical fittings in brass, iron, polished steel and silver.

After Gimson's death, Alfred set up independently as a wheelwright and smith at home in Waterlane and was later joined by his son Norman, who continued and built on the tradition for quality and design established by his father.
