About this piece

Four Victorian cast iron industrial circular windows

In the style of **Coalbrookdale iron works**. Each window with segmented circular radiating window panes and stepped edges to retain the glass when fitted. With pivoting openers and a stepped lip (sealing lip) to help eliminate any draughts when closed, as shown in the images.

They will pivot through approximate *65 degrees*.

Circa 1870. Measuring: 48" across the flats and 2" thick.
