### About this piece

**Pepper pot in silver**, aligned to the *Arts & Crafts Movement*, **c.1910**. A compact bell-based form rises to a shallow collar and domed, pierced cap, the gently polished surface catching light in the round. The silhouette is economical and assured, with a wide, flaring base that stabilises the small vessel while giving it presence on the table. The date code **P** corresponds to **circa 1910**, placing this example within the mature Chipping Campden period of the Guild's production, where restrained profiles and hand-wrought textures convey utility and craft.
