MATERIALS	Brass

About this piece

German, c.1910. A WMF brass jug with a rounded body, narrow neck and flared rim. The surface is pressed with a repeated foliate pattern and the handle cast in a rope-twist form. Produced in Germany around 1910, the jug reflects the workshop's decorative metalware of the early twentieth century, showing the quality and precision typical of WMF's domestic production.

Measurements

Measurements available on request. The piece is currently held in storage at one of our showrooms.
